CHANGE: Motivations

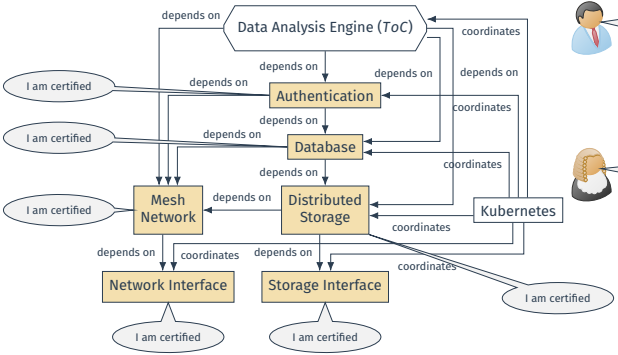

CHANGE: Motivations

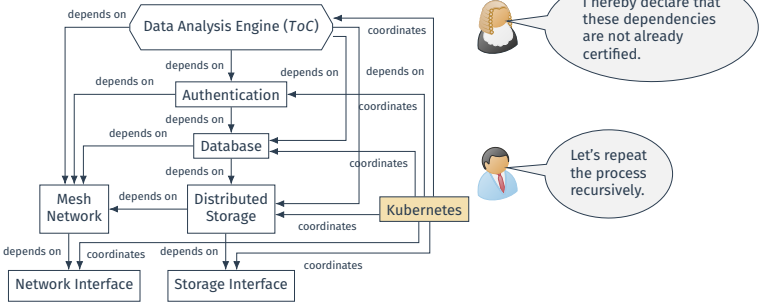

CHANGE: Motivations

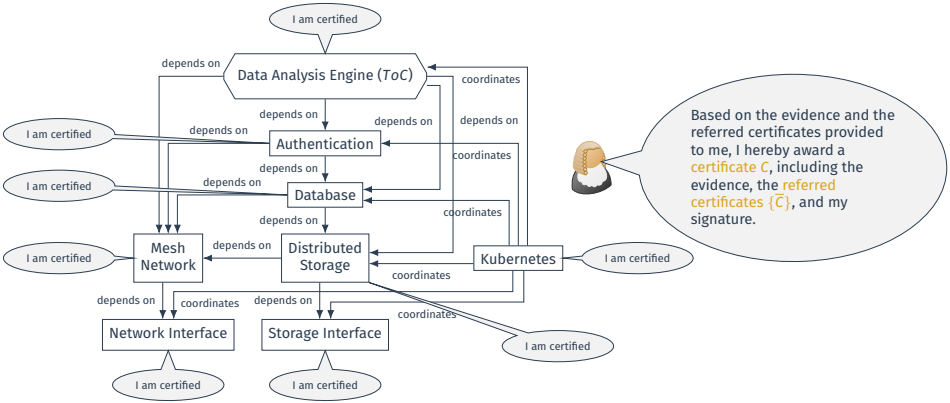

Let's certify this service.
These are its dependencies: are they already certified according to $CM.\overline{CM_i}$?

I hereby guarantee that these dependencies are already certified.

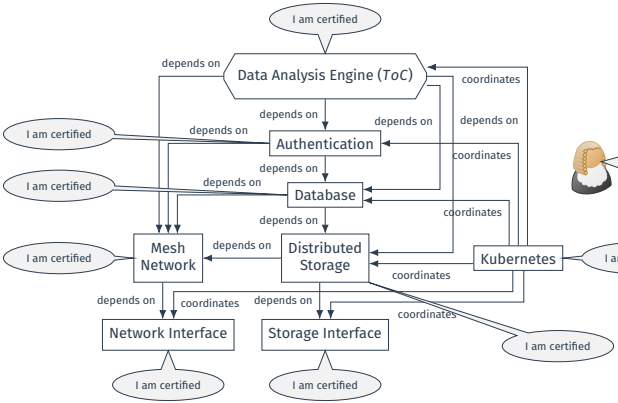

CHANGE: Motivations

CHANGE: Motivations

CHANGE: Motivations

Based on the evidence and the referred certificates provided to me, I hereby award a certificate C, including the evidence, the referred certificates $\{\bar{C}\}$, and my signature.

CHANGE: Our Approach: Overview

Main idea: CHANGE: one sentence stating the idea of the approach

- CHANGE: aspect 1 of the idea, with the key words highlighted
- CHANGE: aspect 2 of the idea
- CHANGE: aspect 3 of the idea

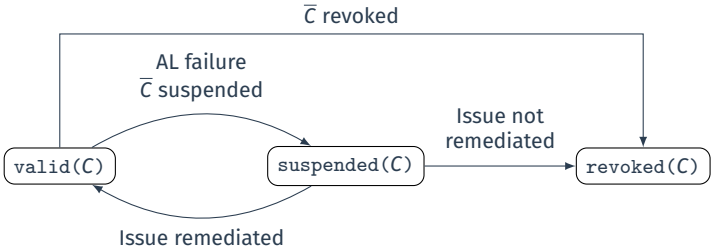

CHANGE: Our Approach: Details

CHANGE: element name

A CHANGE: element is a tuple $\langle x_1, \{y_1, \ldots, y_n\}, \overline{X}, \texttt{sig} \rangle$, where

- x_1 is CHANGE: description of element 1
- $\{y_i\}$ is a set of *CHANGE: elements*, CHANGE: description of element 2
- $\overline{X}=\{\overline{x}_1, ..., \overline{x}_n\}$ is a set of *referred elements*, each $\overline{x}_i$ CHANGE: relation to the element (CHANGE: description of element 3)
- `sig` is CHANGE: description of element 4.

CHANGE: State diagram

CHANGE: Experiments (1)

Goal: CHANGE: goal of the experiments

- CHANGE: item 1: CHANGE: description of the first point...

CHANGE: Experiments (1)

Goal: CHANGE: goal of the experiments

- CHANGE: item 1: CHANGE: description of the first point...
- ...CHANGE: item 2, which appears at the next step

CHANGE: Experiments (2)

CHANGE: fixed header: CHANGE: sentence that stays at every step, with key words and the symbol *T*

CHANGE: introduction of the list, in terms of

- CHANGE: point 1
- CHANGE: point 2
  - CHANGE: sub-point of point 2, with an *emphasized* word

CHANGE: closing sentence

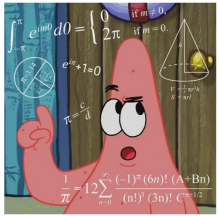

CHANGE: Experiments (2)

CHANGE: fixed header: CHANGE: sentence that stays at every step, with key words and the symbol *T*

CHANGE: sentence about the key concept *T*

- CHANGE: point 1
- CHANGE: point 2

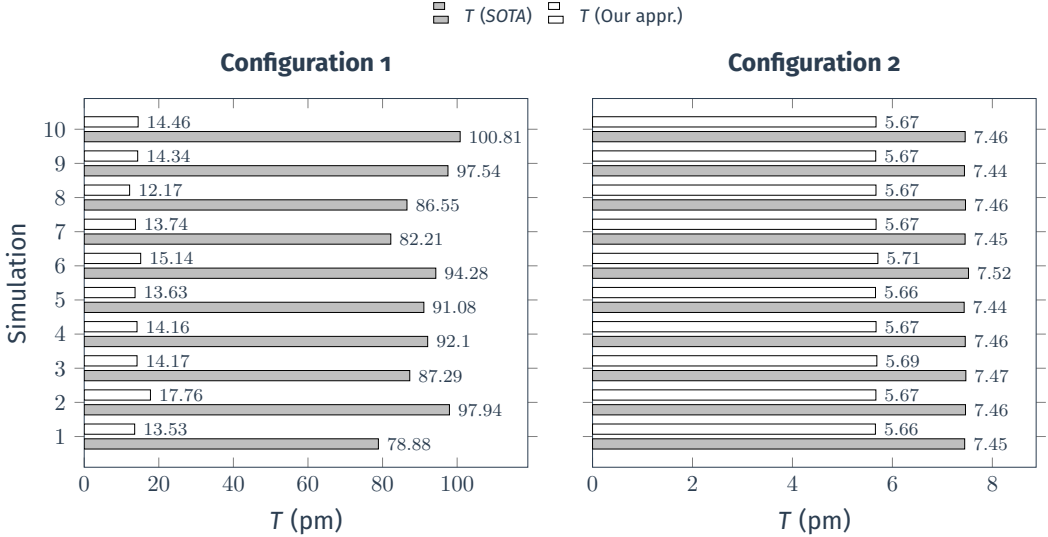

CHANGE: Experiments (2)

CHANGE: fixed header: CHANGE: sentence that stays at every step, with key words and the symbol T

Examples

Ready-to-copy code for the techniques seen in Nicola’s presentations

Example: replacing content, footnotes, external figure

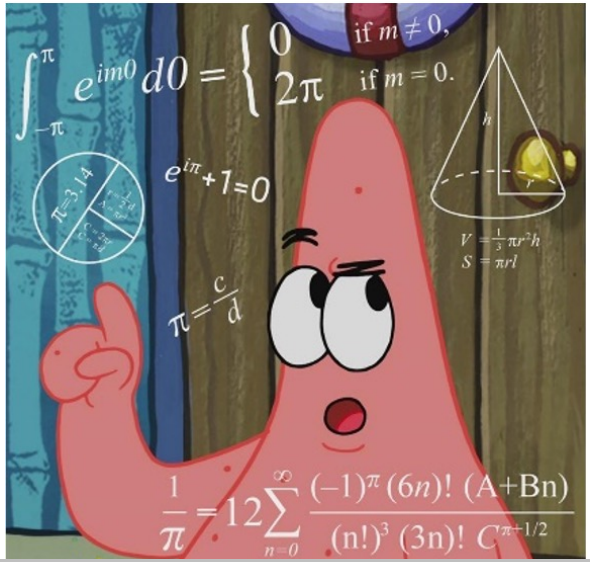

- first point of the first group
- second point, with a key word
- third point

Example: replacing content, footnotes, external figure

- a figure from a source: $13 trillion[a]
- another figure: 29.3 bln[b]
- a third figure: $2.7–6.2 trillion[c]

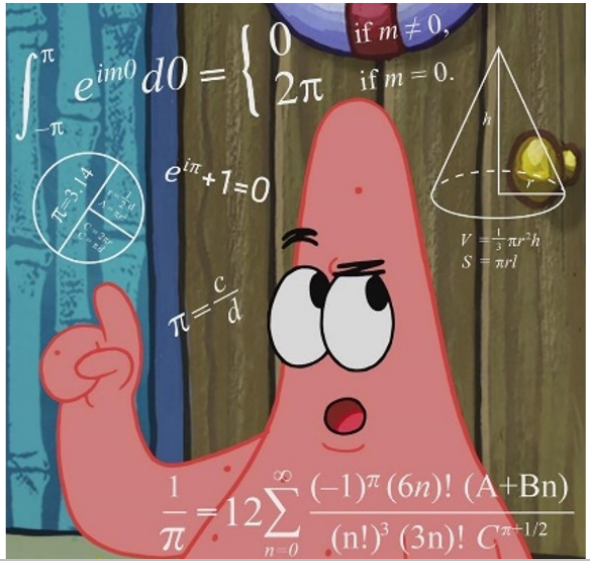

[a] Source: Source A
[b] Source: Source B
[c] Source: Source A

Example: replacing content, footnotes, external figure

- a point with a key word
  - a sub-point

$\Longrightarrow$ conclusion in one line

Example: title of step 1

- highlighted at steps 1 and 3, range kept in a macro
- highlighted only at step 2
- the same two ranges, written directly

a TikZ node highlighted at steps 1 and 3

Example: the title changes with the step

- highlighted at steps 1 and 3, range kept in a macro
- highlighted only at step 2
- the same two ranges, written directly

a TikZ node highlighted at steps 1 and 3

Example: the title changes with the step

- highlighted at steps 1 and 3, range kept in a macro
- highlighted only at step 2
- the same two ranges, written directly

a TikZ node highlighted at steps 1 and 3

Example: one figure, first frame

Example: one figure, first frame

Example: one figure, first frame

Example: the same figure, second frame

Example: the same figure, second frame

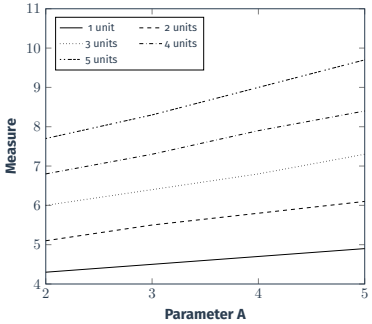

Example: completed sentence, line plots, summary line

Measure varying the number of

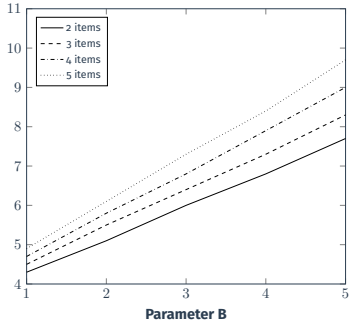

- parameter A in $\{2, ..., 5\}$
- parameter B in $\{1, ..., 5\}$

Example: completed sentence, line plots, summary line

Measure varying the number of parameter A and parameter B

Varying parameter A

Varying parameter B

$\Longrightarrow$ linear increase of the measure

Example: stacked tables with captions

Name	Column 2	Column 3	Description
Item1	A	B–C	First item
Item2	A	B	Second item
Item3	C	C	Third item

First table

Name	Column 2	Column 3	Description
Item4, Item5	A	B	A longer description of both items
Item6	C	B	Another long description that wraps on two lines

Second table

Example: table next to bullet points

Step	Value	Cost	
		Unit A	Unit B
Step 1: first	8,932,049	0.41	1,288.920
Step 2: second	5,136,015	0.235	741.141
Step 3: third	4,076,328	0.187	588.225
Total	18,144,392	0.832	2,618.286

- Cost=*value*×*unit cost*
- Unit cost: 45.85×10^{-9}
- 1 unit A = 3,147.28 unit B
- a note in *italics*

Example: title slide with logos and funding

Speaker[1] Author Two[1] Author Three[2]

[1]Affiliation 1

[2]Affiliation 2

The work was partially supported by *i)* project A, funded by the funder under the call number 1; *ii)* project B, funded by another funder.
