ITADATA 2026

CHANGE: Background

CHANGE: il concetto, lo schema o il contesto di cui parla il lavoro, con i suoi elementi. Meglio una figura che una definizione lunga.

CHANGE: Motivations

CHANGE: il problema, e perché lo stato dell'arte non basta. Meglio mostrarlo su un esempio concreto (una figura di uno scenario).

CHANGE: Our Approach: Overview

CHANGE: una frase sull'approccio e sotto un punto per componente. Le slide dopo corrispondono ai punti, nello stesso ordine: è un indice implicito dei contenuti, non una scaletta.

CHANGE: Our Approach: Details

CHANGE: una slide per componente, dall'alto verso il basso: dove sta nell'approccio complessivo, poi cos'è. Meglio un'immagine, anche animata, di una definizione lunga. Si copia il frame per ogni componente (Details (1), (2), ...).

CHANGE: Example

CHANGE: l'esempio si può raccontare dentro ogni componente, mentre lo presenti, oppure passo passo dopo l'approccio. Dipende dal tempo.

CHANGE: Experiments

CHANGE: obiettivo degli esperimenti e come sono impostati. Se sono tanti, mostra solo il sottoinsieme che fa passare l'intuizione. Una o due slide.

CHANGE: Results

CHANGE: i risultati, per esempio come grafici, con una sola conclusione per grafico.

CHANGE: Conclusions

CHANGE: una riga su cosa è stato fatto, due punti sui vantaggi, poi i lavori futuri.

Thanks! Questions?

01 Examples

Ready-to-copy code for the techniques seen in Nicola's presentations

02 Basic: highlighted list next to a figure

This list highlights the current step in the process:

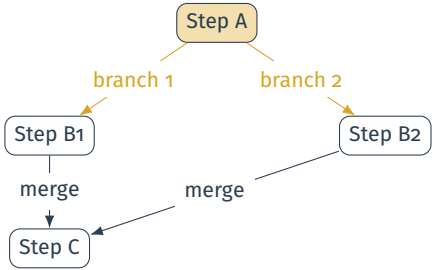

- Step A
- Step B1
- Step B2
- Step C

02 Basic: highlighted list next to a figure

This list highlights the current step in the process:

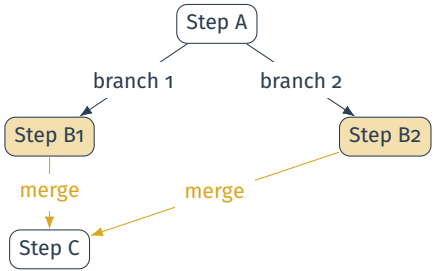

- Step A
- Step B1
- Step B2
- Step C

02 Basic: highlighted list next to a figure

This list highlights the current step in the process:

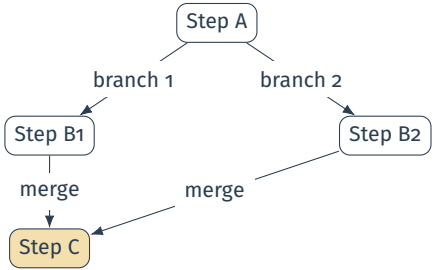

- Step A
- Step B1
- Step B2
- Step C

02 Basic: highlighted list next to a figure

This list highlights the current step in the process:

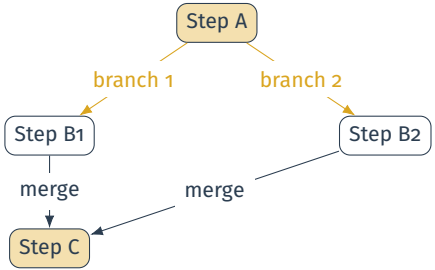

- Step A
- Step B1
- Step B2
- Step C

02 Basic: highlighted list next to a figure

This list highlights the current step in the process:

- Step A
- Step B1
- Step B2
- Step C

Component definition

A component is represented by $\langle n, I, O \rangle$, where

- n is the component name;
- I is the set of input elements;
- O is the set of output elements.

04 Basic: progressive content with `\pause`

- First point, visible from the beginning.

04 Basic: progressive content with `\pause`

- First point, visible from the beginning.
- Second point, revealed at the next overlay.

05 Basic: replacing content with `\only`

First view

This block is visible only on the first overlay.

05 Basic: replacing content with `\only`

Final view

The previous block is replaced by this content.

06 Basic: stacked tables

Item	Status	Description
Item A	ready	Short description
Item B	pending	Another description

First table

Item	Value	Comment
Item C	12	A longer comment that wraps onto a second line
Item D	27	Another comment with controlled cell width

Second table

06 Basic: table with grouped columns

Step	Value	Cost	
		Unit A	Unit B
Step 1	8	0.41	1.29
Step 2	5	0.24	0.74
Step 3	4	0.19	0.59
Total	**17**	**0.84**	**2.62**

- The value is the measured quantity.
- Unit A and Unit B show two cost estimates.
- The final row gives the total.

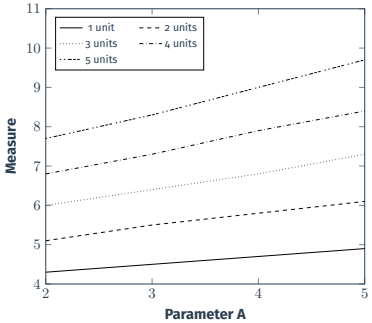

07 Basic: completed sentence and line plots

Measure varying the number of

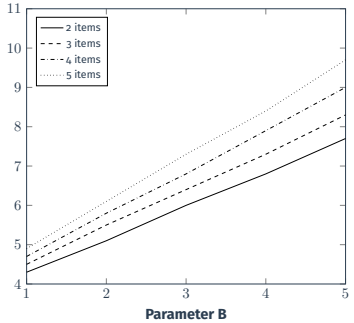

- parameter A in $\{2, \ldots, 5\}$
- parameter B in $\{1, \ldots, 5\}$

07 Basic: completed sentence and line plots

Measure varying the number of parameter A and parameter B

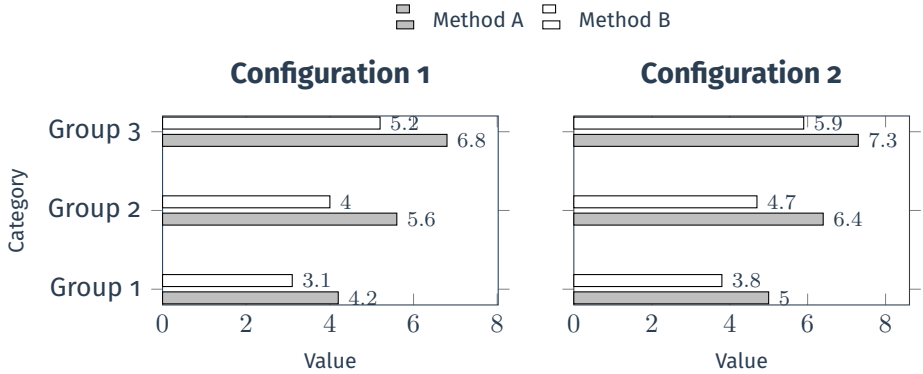

Varying parameter A

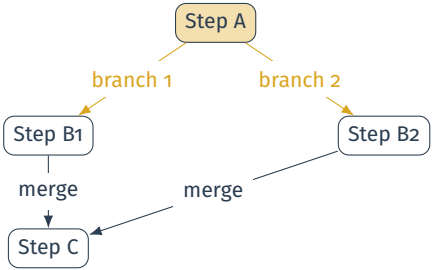

Varying parameter B

$\Longrightarrow$ linear increase of the measure

07 Advanced: horizontal bar plots from a CSV

09 Advanced: chevrons and fading background

A sentence introducing the three phases...

09 Advanced: chevrons and fading background

A sentence introducing the three phases...

Phase 1 | **Phase 2** | **Phase 3**

- **Item 1**: first short statement
- **Item 2**: second short statement
- **Item 3**: third short statement

09 Advanced: chevrons and fading background

A sentence introducing the three phases...

09 Advanced: chevrons and fading background

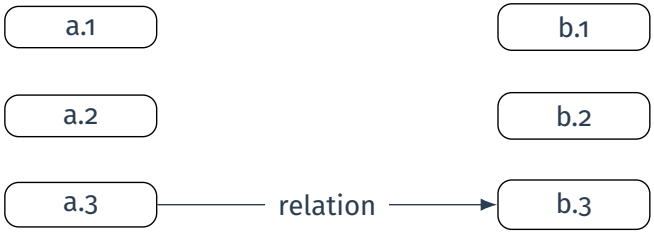

A sentence introducing the three phases...

10 Advanced: reusable component with `\pic`

The same component is instantiated twice:

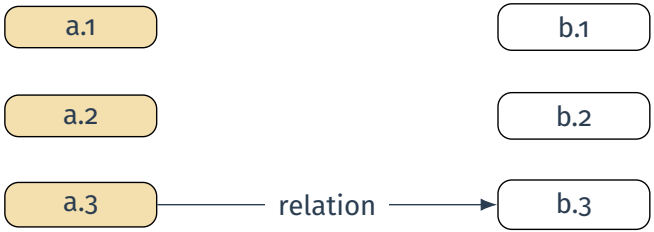

- **Name**: `a` or `b`; it becomes part of the node names.
- **Position**: the second argument moves the whole group.
- **Overlay**: the third argument selects when that group is highlighted.
- The relation uses the generated nodes `box-a-3` and `box-b-3`.

10 Advanced: reusable component with `\pic`

The same component is instantiated twice:

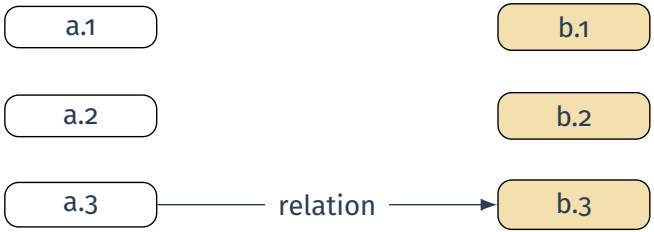

- **Name**: `a` or `b`; it becomes part of the node names.
- **Position**: the second argument moves the whole group.
- **Overlay**: the third argument selects when that group is highlighted.
- The relation uses the generated nodes `box-a-3` and `box-b-3`.

10 Advanced: reusable component with `\pic`

The same component is instantiated twice:
